ENGAGE WITH CAHSI

The **Computing Alliance of Hispanic-Serving Institutions** plays a pivotal role in recruiting, retaining, and advancing Hispanics in computing. We are four-year and two-year universities and colleges that work with STEM alliances, industry leaders, nonprofits, and government entities to graduate students who are competitive in the computing workforce and academia. We operate using a **collective impact** approach.

Our **Vision** is that by 2030, Hispanics will represent 20% or more of those who earn credentials in computing.
