about
The CAHSI Allyship program pairs students in the fundamental courses with student allies (those who have completed data structures) for the success of females in computing.

who
Protégés: undergraduate students pursuing computing-related majors enrolled in computing fundamentals courses.

Allies: Students who have completed fundamental courses in computing-related majors and who are passionate about diversity in computing.

APPLICATION OPEN DEADLINE
30th SEPTEMBER 2022

The benefits of the program include learning about resources, growing from shared experiences, connecting with students in your major, learning from professionals and receiving a small stipend.

This program supports students from underrepresented groups who identify as female or non-binary and who are enrolled in computing-related majors.

Supported by REBOOT REPRESENTATION

CAHSI - Computing Alliance of Hispanic-Serving Institutions
